VISION NET LTD ACQUIRES MULTIVERSE, INC.

Vision Net, one of Cleveland's premier Internet Service Providers (ISP) and network consulting companies, has purchased Multiverse, Inc. The transaction was finalized on May 30, 2003.

The combination results in a complete array of service offerings relating to computing and Internet. Vision Net now offers Internet service, LAN / WAN consulting and Website / Web application development / Web hosting.

Aaron Woldman, president of Vision Net relates, "It made a lot of sense to combine the two entities. Our customers can now rely on a single source for all their Internet and local networking needs".
